

Shrink over terminals for insulation and strain relief.

## General purpose flexible polyolefin

### Flame retardant

### U/L, CSA, MIL-Spec.

Heat Shrinkable Polyolefin Tubing is a highly flexible, radiation cross-linked tubing used for insulating, jacketing and identification. It will not melt, is mechanically tough and will not split when shrunk.

Made from flame-retardant polyolefin, it has excellent electrical, chemical and physical properties representing a good all purpose heat shrinkable tubing.

Application of heat above 121°C will shrink this tubing quickly to 50% of its supplied diameter or snug down on the object it is to cover.

Resists a wide range of chemicals and oils, as well as sunlight, moisture and fungus.

Also available in 3:1 and 4:1 shrink ratio and Medical Grade UPS class VI.

Specifications:	
U/L Subject224	VW-1
CSA, OFT	
AMS 3636	
ASTM 3637	
M23053/5	
<b>Longitudinal Shrinkage:</b> less than 5%	
<b>Storage:</b> very stable; can be stored over extended intervals without change.	
<b>Temperature Rating:</b> continuous operation from -55°C to 135°C.	
<b>Electrical:</b> 1300 volts per mil.	
<b>Standard Colors:</b> black, white, clear, red, blue and yellow (most sizes in brown, orange, green, violet and gray)
